

Heckington St Andrew's Church of England Primary School Newsletter

12th March 2020

Year 6 are having an amazing time at Hilltop!

We look forward to hearing all about it when they come back to school tomorrow!

On Tuesday, Chestnut Class were visited by Partake History. They took part in an Ancient Greek production of Jason and the golden fleece. Whilst having fun taking part in an exciting production, they learned about Ancient Greek theatre, Greek mythology, acting skills and how to pull off a fetching mask. The children had a great afternoon and had so much fun, they didn't even know they were learning anything.

Parents' Evening appointments on 24th and 25th March are available to book.

Please use the following link;
heckingtonstrewscofe.parentseveningsystem.co.uk

Please do pop into the office should you have any difficulties using this system and we can make the appointment for you.

- 02.04.20 Easter Church Service 2.30pm St Andrew's Church including Awards
- 02.04.20 Last day of term

Wear sports wear tomorrow for Sport relief

Tomorrow we will be showing our support for Sports Relief. Children will engage in active learning activities throughout the day.

Everyone is invited to participate and to make tomorrow even more exciting the children are able to **wear sports wear for the day for a donation of £1.**

During British Science Week we have been fortunate enough to have had our workshops enhanced by Peter Snowball, a parent and RAF flight engineer. The children have enjoyed experimenting with different designs for air crafts, followed by some water pressure powered launches on the playing field.

On Thursday each child accessed a rocket workshop with Mr Snowball and his colleague.

As well as lots of practical science and engineering workshops we have been learning more about our house namesakes. The finished products of this whole school creative project will soon be on display celebrating the significant figures from our county that helped to shape the world as we know it today.
